

LAB # 02

Exercise

Theory Questions.

1. What do you mean by HTML formatting Tags?

HTML formatting tags are used to change the appearance of text on a webpage. They can make text bold, italic, underlined, highlighted, subscript, or superscript.

2. What is attribute in HTML with detail?

An attribute gives **extra information** about an HTML element. It is written inside the opening tag.

e.g.

```
<p align="center">yo uzzi here</p>
```

3. Write five formatting tags with description.

Tag	Description
	Makes text bold
<i>	Makes text italic
<u>	Underlines text
<sup>	Creates superscript text
<sub>	Creates subscript text

4. How to write code of HTML with Notepad.

- Open **Notepad**.
- Write the HTML code.
- Click **File → Save As**.
- Save the file with .html extension.
- Open the file in a web browser.

5. Define font tag with syntax and example?

The tag is used to change the **color, size, and font style** of text.

Syntax:

```
<font color="blue" size="5">woo here we go again</font>
```

e.g.

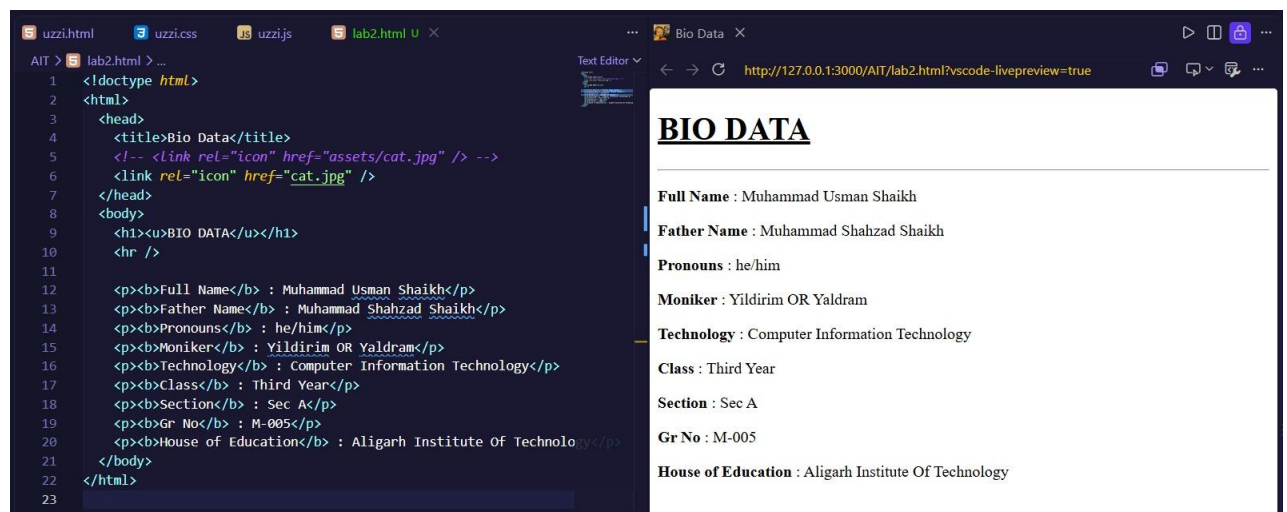

```
<font color="red" size="4">
```

Welcome To Uzzi's website

```
</font>
```

Practical Question

- 1) Write a HTML program on Note Pad to display your BIO DATA on the browser but use some formatting tags.

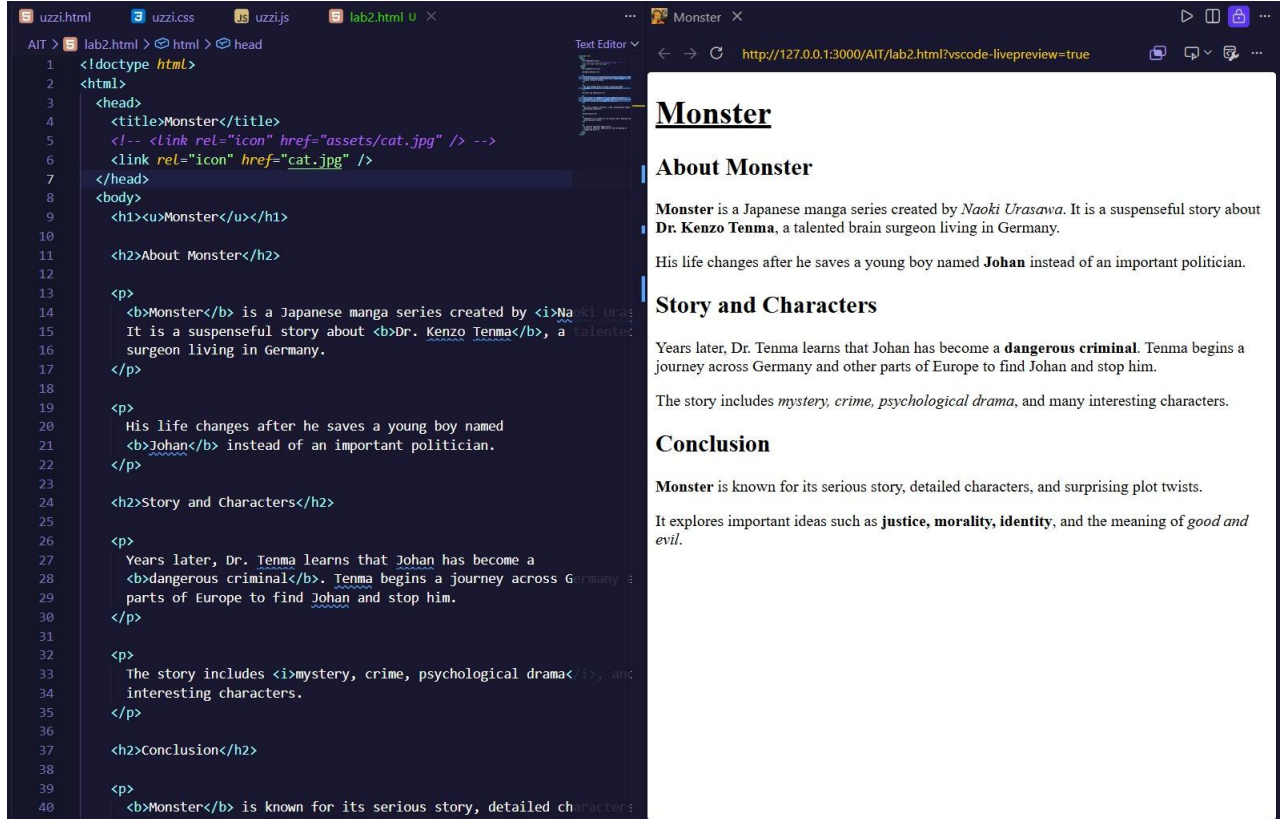

The screenshot shows a web browser window displaying a bio data page. The page has a title "BIO DATA" and a list of personal information. The information is displayed in a table-like format with labels and values. The labels are in bold and the values are in regular text. The browser address bar shows the URL "http://127.0.0.1:3000/AIT/lab2.html?vscode-livepreview=true".

The HTML code in the text editor is as follows:

```
1 <!doctype html>
2 <html>
3   <head>
4     <title>Bio Data</title>
5     <!-- <link rel="icon" href="assets/cat.jpg" /> -->
6     <link rel="icon" href="cat.jpg" />
7   </head>
8   <body>
9     <h1><u>BIO DATA</u></h1>
10    <hr />
11
12    <p><b>Full Name</b> : Muhammad Usman Shaikh</p>
13    <p><b>Father Name</b> : Muhammad Shahzad Shaikh</p>
14    <p><b>Pronouns</b> : he/him</p>
15    <p><b>Moniker</b> : Yildirim OR Yaldrum</p>
16    <p><b>Technology</b> : Computer Information Technology</p>
17    <p><b>Class</b> : Third Year</p>
18    <p><b>Section</b> : Sec A</p>
19    <p><b>Gr No</b> : M-005</p>
20    <p><b>House of Education</b> : Aligarh Institute Of Technology</p>
21  </body>
22 </html>
23
```

- 2) Write a HTML Program on Note Pad to display information of Pakistan with at least two paragraph with some heading and use formatting tags your self-choice.

```
1 <!doctype html>
2 <html>
3   <head>
4     <title>Monster</title>
5     <!-- <link rel="icon" href="assets/cat.jpg" /> -->
6     <link rel="icon" href="cat.jpg" />
7   </head>
8   <body>
9     <h1><u>Monster</u></h1>
10
11     <h2>About Monster</h2>
12
13     <p>
14       <b>Monster</b> is a Japanese manga series created by <i>Naoki Urasawa</i>. It is a suspenseful story about
15       <b>Dr. Kenzo Tenma</b>, a talented brain surgeon living in Germany.
16     </p>
17
18     <p>
19       His life changes after he saves a young boy named
20       <b>Johan</b> instead of an important politician.
21     </p>
22
23     <h2>Story and Characters</h2>
24
25     <p>
26       Years later, Dr. Tenma learns that Johan has become a
27       <b>dangerous criminal</b>. Tenma begins a journey across Germany's
28       parts of Europe to find Johan and stop him.
29     </p>
30
31     <p>
32       The story includes <i>mystery, crime, psychological drama</i>, and
33       interesting characters.
34     </p>
35
36     <h2>Conclusion</h2>
37
38     <p>
39       <b>Monster</b> is known for its serious story, detailed characters
40       and surprising plot twists. It explores important ideas such as
41       <b>justice, morality, identity</b>, and the meaning of <i>good and
42       evil</i>.
```

Objective and MCQS

1) _____ Tag play a very important role in making a website more user friendly and increasing content readability ____.

- a) <i>
- b)
- c)
- d) <sub>

2) _____ provide additional information about an element and is placed inside the element's

a) attributes

b) value

c) tag

d) nothing all

3) Attributes are always specified in the _____ tag

a) end

b) middle

c) start

d) nothing all

4) Every tags has 4 common attributes these are

a) Width, height, color and size

b) Name, id, width, and height

c) Class, height, width, and size

d) Name, id, class and style

5) The _____ tag defines the subscript text. Like H₂O to be written as H₂O.

a) <sup>

b) <emp>l

c) ****
