

LAB # 04

Exercise

Theory Question

- 1) What is hyperlink and write their types?

Answer:

A hyperlink is a clickable element (text, image, or button) in an HTML document that connects one web page to another page, file, or location.

Syntax:

```
<a href="url">Link Text</a>
```

HTML Hyperlink Types.

Links are used to “link” a visitor from one area to another.

There are three types of links:

- 1. Local or Relative:** A page on the same server or directory
- 2. Internal:** A section on the current page or document
- 3. External or Absolute:** A page or site on a different server or directory

2) Describe Target attribute of HTML hyperlink.

Answer:

The target attribute specifies where the linked document will open when the hyperlink is clicked.

Syntax:

```
<a href="url" target="_value">Link</a>
```

Values of Target Attribute:

The target attribute can have one of the following values:

_self - Default. Opens the document in the same window/tab as it was clicked

_blank - Opens the document in a new window or tab

_parent - Opens the document in the parent frame

_top - Opens the document in the full body of the window

Example:

```
<a href="https://google.com" target="_blank">Open Google in New Tab</a>
```

3) Hyperlink how will appear as follows in all browsers?

Answer:

By default, a hyperlink appears as follows in all browsers:

- **Unvisited Link** → Blue color with underline
- **Visited Link** → Purple color with underline
- **Active Link (being clicked)** → Red color with underline
- **Mouse Hover** → Hand (pointer) cursor appears

Example:

```
<a href="https://google.com">Visit Google</a>
```

This link will appear blue and underlined in all browsers until visited.

Practical Question

- 1) Write a HTML program on your web site project same as Example-3 of chapter-3.

Input

```
<!DOCTYPE html>
<html>
<head>
  <title>Xpert Interior</title>
  <link rel="icon" type="image/x-icon" href="Images/xpert interior/xpert logo.jpeg">
</head>
<body>
  <marquee bgcolor="blue" behavior="alternate" direction="left">  <font
color="white">Welcome To xpert Interiors Where Quality Meets efficiency.
  </font></marquee>
  <header align="center"></header>
  <p >
    
    
    
    
    
    
    
  </p>
  <hr>
  <marquee behavior="" direction="right">
    
    
    
    
  </marquee>
  <h3 >
    Servies By Interior Designers
  <p>
    <font color="black"><span style="background-color: blue;">
    Core Design & Planning Services
    • Space Planning: Creating functional floor plans, furniture layouts, and traffic flow analysis.
    • Concept & 3D Visualization: Developing mood boards, color schemes, and realistic 3D
    renderings of the final look.
```

- Architectural Coordination: Reviewing building codes, lighting plans, false ceilings, and structural adjustments.
